Volume contents

Volume 99 (1994)

PHYSIOLOGY AND BIOCHEMISTRY

Extracellular calmodulin accelerates the proliferation of suspension-cultured cells of *Angelica dahurica*
D.-y. Sun, H.-b. Li, G. Cheng (Shijiazhuang, China) 1–8

Demonstration of abscisic acid in spores and hyphae of the arbuscular-mycorrhizal fungus *Glomus* and in the N_2-fixing cyanobacterium *Anabaena variabilis*
H. Esch, B. Hundeshagen, Hj. Schneider-Poetsch, H. Bothe (Köln, Germany) 9–16

Hydroponic and tissue culture evaluation of alfalfa (*Medicago sativa* L.) subpopulations selected for phosphorus efficiency
S.L. Sain, D.K. Barnes, D.D. Biesboer (British Columbia, Canada; St. Paul, MN) 17–26

Chitinase isoforms in roots of various pea genotypes infected with arbuscular mycorrhizal fungi
E. Dumas-Gaudot, A. Asselin, V. Gianinazzi-Pearson, A. Gollotte, S. Gianinazzi (Dijon, France; Québec, Canada) 27–37

Pyridine nucleotide-dependent changes in the phase-partitioning behavior of NADP-linked glyceraldehyde-3-phosphate dehydrogenase from pea chloroplasts
L.E. Anderson, D. Li, M.M. Pacold (Chicago, IL) 39–42

β-Oxidation of fatty acids is linked to the glyoxylate cycle in the aleurone but not in the embryo of germinating barley
W.L. Holtman, J.C. Heistek, K.A. Mattern, R. Bakhuizen, A.C. Douma (AL Leiden, The Netherlands) 43–53

The effects of a non-specific lipid transfer protein on a cell-free reconstitution of phosphatidylinositol transfer to plant plasma membranes
P. Harryson, A. Hmyene, F. Guerbette, J.-C. Kader, A.S. Sandelius (Göteborg, Sweden; Paris, France) 55–62

GENETICS AND MOLECULAR BIOLOGY

Transposition and behaviour of the maize transposable element Ac in transgenic haploid *Datura innoxia* Mill
T. Schmidt-Rogge, B. Weber, T. Börner, E. Brandenburg, O. Schieder, M. Meixner (Berlin, Germany) 63–74

Studies of a gibberellin-dependent DNA-binding protein related to the expression of a rice α-amylase gene
S. Goldman, Y.R. Mawal, I. Tanida, R. Wu (Ithaca, NY; Quebec, Canada) 75–88

CELL AND TISSUE STUDIES IN VITRO

Somatic hybridization in *Citrus* using embryogenic cybrid callus
W. Saito, T. Ohgawara, J. Shimizu, S. Kobayashi (Chiba and Hiroshima, Japan) 89–95

GENERAL

Changes in the two-dimensional protein pattern and in gene expression during the sink-to-source transition of potato tubers
K. Borgmann, P. Sinha, W.B. Frommer (Berlin, Germany) 97–108

Announcement 109

REVIEW ARTICLE

Phosphoenolpyruvate carboxylase: structure, regulation and evolution
L. Lepiniec, J. Vidal, R. Chollet, P. Gadal, C. Crétin (Orsay, France; Lincoln, NE) 111–124

PHYSIOLOGY AND BIOCHEMISTRY

Wild and cultivated barley genotypes demonstrate varying ability to acclimate to plant water deficits
D. Gunasekera, M. Santakumari, Z. Glinka, G.A. Berkowitz (Brunswick, NJ; Tel Aviv, Israel) ... 125–134

Different amounts of cytochrome P-450 dependent monooxygenases in tulip bulbs, pea seedlings and maize endosperm cells
L. Marabini, S. Radice, B. Cipelletti, E. Chiesara (Milan, Italy) ... 135–140

Induction and characterization of chitinase isoforms in cucumber (*Cucumis sativus* L.): effect of elicitors, wounding and pathogen inoculation
Y.-Y. Zhang, Z.K. Punja (British Columbia, Canada) ... 141–150

Evidence to show the phosphoprotein nature of poly(A) polymerase in germinated wheat embryos: enzyme regulation through phosphorylation
N. Verma, R.C. Sachar (Delhi, India) ... 151–160

GENETICS AND MOLECULAR BIOLOGY

Immunological characterization of plant polyadenylate-binding proteins
J. Yang, A.G. Hunt (Lexington, KY) ... 161–170

Four promoters in the rice plastid *psb*K-*psb*I-*psb*D-*psb*C operon
S.G. Chen, J. Lu, M. Cheng, L.F.O. Chen, P. Lo (Taiwan, Republic of China) ... 171–182

Molecular characterization of two tomato U6 RNA pseudogenes generated by RNA-mediated mechanisms
A. Szkukálek, F. Solymosy (Szeged, Hungary) ... 183–187

Cloning of a cDNA encoding a putative cysteine protease from germinating maize seeds
E.G. deBarros, B.A. Larkins (Viçosa, Brazil; Tucson, AZ) ... 189–197

Molecular and immunological characterization of leucine aminopeptidase in *Arabidopsis thaliana*: a new antibody suggests a semi-constitutive regulation of a phylogenetically old enzyme
D. Bartling, J. Nosek (Bochum, Germany) ... 199–209

CELL AND TISSUE STUDIES IN VITRO

Media and protocols for the isolation of independent mutants and transformants from *Nicotiana plumbaginifolia* protoplasts
G.G. Presting, J.P. Helgeson (Madison, WI) ... 211–221

GENERAL

Localization of phenolic compounds in crowns and roots of healthy and *Rhizoctonia solani*-infected sugar beets
J.M. Halloin (East Lansing, MI) ... 223–228

Subject index Volume 99 ... 229–232
Author index Volume 99 ... 233–234
Volume contents Volume 99 ... 235–236
